

Q2) Create a HTML registration form and to validate the form using JavaScript code.

```
<html>
  <head>
    <script>
      function validate()
      {
        var msg="";
        if(document.getElementById('log').value=="")
        {
          msg = "username";
          document.getElementById('log').focus()
        }if(document.getElementById('pass').value=="")
        {
          if(msg!="")
          {
            msg+=" and "
          }
          msg+="password";
        }
        if(msg!="")
        {
          alert("provide "+msg);
          return false;
        }
      }
    </script>
  </head><body onload=document.getElementById(log).focus()>
    <form action="login.php" method="post" onsubmit="return validate();" >
      Login-Name: <input type="text" id="log"></br></br>
      Pass-word: <input type="password" id="pass"></br></br>
      <input type="submit" name="submit1" value="Login">

    </form>
  </body>
</html>
```
